We will provide everything your company requires!

The background is a dark blue gradient. A diagonal line of fine, light blue lines runs from the top-left towards the bottom-right. Scattered across the page are several stylized, light blue spheres. Each sphere is composed of multiple overlapping, curved lines that create a sense of depth and rotation. The spheres vary in size and are positioned at various points along the diagonal line.

Th Onilog Solutions

Cross-Docking

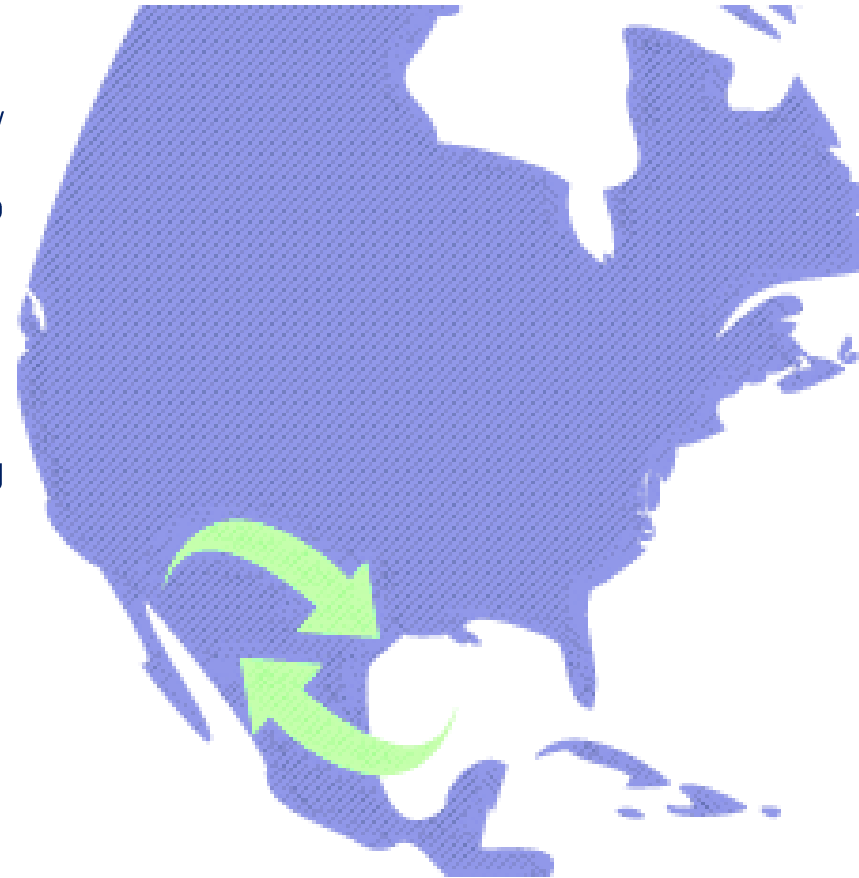

Cross-Docking

Different laws in transport between different countries require companies that are dedicated to import / export of goods to consolidate or separate shipments by the differences between the load capacities allowed.

To resolve that situation in Onilog we receive the products from any country, we verify the conditions at the products and ship according to the laws of the target country of the goods.

The Corss-Docking of the goods can also be performed for the following reasons:

- ④ To sort material intended for different places.
- ④ Combine two or more different products in the same trailer.
- ④ Optimize space.

Advantages / Benefits

- ✓ Streamline the supply chain.
- ✓ Avoid fines and filler retention for excess dimensions and / or weight load permitted

Advantages

Benefits

- ✓ consolidation of the load, resulting in savings.
- ✓ Specialised staff in the Cross-Docking of goods.
- ✓ Traffic management experts to work for your operation.
